Maintenance for Normal Operating Conditions

IMPORTANT: Check the Toyota on-line system for any outstanding manufacturer service campaigns.

- Replace engine oil and filter
- Replace engine air cleaner filter
- Replace brake fluid
- Rotate wheels
- Balance front wheels
- Clean air conditioner filter
- Road test vehicle

Inspect, correct or adjust the following:

- Drive belts
- Cooling and heater system; check that the radiator and condenser are not blocked with leaves, dirt, or insects, and the hose connections for installation condition and corrosion
- Engine coolant
- Exhaust pipes and mountings
- Battery
- Fuel tank cap, fuel lines, connections and fuel vapour control valve
- Charcoal canister
- Brake pedal and parking brake
- Brake pads and discs
- Clutch fluid
- Brake pipes and hoses
- Steering wheel and linkage
- Drive shaft boots
- Suspension ball joints and dust covers
- Shift lever for manual transmission (M/T Models)
- Automatic transmission fluid
- Manual transmission oil
- Front and rear suspensions
- Tyres and inflation pressures
- Lights, horns, wipers and washers
- Seatbelt, webbing condition, buckle and retractor mechanism operation
- Air conditioner, including refrigerant level

The times above give the recommended time in hours to perform a normal service. Additional time maybe required to correct items or replace parts as identified during the maintenance operation.
Ask your Service Advisor for the time to perform any additional maintenance.
